

Latest Project Implemented End-To-End Web App, ML Model, Pipeline

- Number Of users Of App – 30-40 Approx
- Built Web App in Flask, back end data store No SQL(DynamoDB)
- Users enter basic information about job, candidate
- Hosted data in back end NoSql DB – DynamoDB
- Copy the data to Redshift daily.
- Enrich, Transform, Create Feature set and Load to Object Storage(S3)
- ML Model – predicts and output data to S3
- Updated data synced to DynamoDB.
